

Dermapen Skin Needling

Your skin may feel warm to touch immediately after your procedure with some redness that also feels like a mild sunburn and 3-5 days later become a little dry and flaky. This is a completely normal process due to the dead skin cells being stimulated upwards. Once this process is finished, your skin will feel softer and look radiant.

POST DERMAPEN CARE!

- Do not cleanse your skin for 12 hours post procedure
- Do not pick, scratch or peel the skin. FINGERS OFF!
- Drink plenty of water to assist in faster healing and rejuvenation
- Use the recommend post care products daily to support skin recovery and long-term skin health

AVOID THE FOLLOWING ACITIVES FOR ATLEAST 2-14 DAYS FOLLOWING DERAMAPEN TREATMENT!

- Direct sunlight/solariums. Dermaceuticals Cover Recover or O Cosmedics Mineral Pro SPF 30+ is mandatory and must be reapplied every 2 hours if you are outside (2 days)
- Waxing/hair removal on treatment area (14 days - pre/post)
- Make-up - Dermaceuticals Cover Recover is recommend to use to support recovery and a great daily foundation (2 days) or you can use O Cosmedics 1SKIN Foundation
- Sweating such as intensive cardio, exercise, hot showers, baths, spas and saunas (2 days)
- Spray or self-tanning (2 days)
- Swimming in chlorinated pools or the ocean (2 days)
- Tattooing (2 - 14 days)
- No exfoliating products, AHA's, Vitamin A products, Retin A, scrubs, tropical alcohol or enzymes (5 days)
- Peels, IPL, laser, injectables and cosmeceutical facial treatments that are not prescribed by your clinic (7-14 days - pre/post)

Results are noticeable after one treatment but you can achieve your skin goals faster with a course of treatments and professional homecare
